CHAIR

For the craftsman who wants to make a simple garden chair in a very short time, this one fills the bill. There are no fancy cuts, the whole project can be made on the circular saw and jointer. Only two 1" x 12" by 12-foot long pieces of material are required. A few coats of outside paint, and the project is finished.

BILL OF MATERIALS

Req. No.	Name	Size
2 (A)	Arm Rest	¾x7x29½
2 (B)	Seat Support	¾x4¾x41½
